Terms and Conditions of Hire

In the below “we”, “us” and “the company” refer to JJL Computers LTD. The “hirer”, “customer” or “you” refers to the person hiring equipment and/or services from JJL Computers LTD.

Equipment hired will be entirely the responsibility of the hirer, who is responsible for any loss or damage to the equipment. This liability begins on collection/delivery of the equipment and ends upon its safe return to the company. Hirers must therefore ensure sufficient protection exists against theft, fire & damage through misuse. Items not returned will be charged for at full replacement costs.

Plugs, sockets and connectors must not be removed from any equipment. We supply a range of adaptors to suit all requirements that you must ask for if needed. Any item returned where a plug, socket or connector has been removed or tampered with will be subject to an additional charge. Equipment must not be modified or disassembled in any way whatsoever without the prior express permission of the company.

The hirer will be responsible for ensuring all relevant regulations, rules and statutory provisions relating to the use of the hire equipment are complied with during the hire period and shall keep the Company indemnified against all liability for any non-compliance with any such regulation or provision.

Hired items are, and remain the property of JJL Computers LTD at all times. All hire delivery and collection quotes are an approximation and are subject to final transportation charges which may vary due to the size of vehicle required to transport the chosen equipment.

Any damage to hired equipment must be reported to the company within 24 hours of the damage being sustained. Equipment damaged or not returned at the end of the hire period is considered on-hire until payment has been received for the repair/replacement of the item. Any costs incurred by the company in fulfilling a hire following the loss/damage of items or where equipment is returned in a condition not fit to re-hire will be passed on to the original hirer.

Any mistakes in supply, faulty equipment, or items not required, must be reported within 24 hours of delivery otherwise, the full invoice charge for the hire or supply of the item will be levied.

The company accepts no responsibility for equipment that does not work when used in conjunction with equipment belonging to others or any other resources you may use (such as power supplies).

The cancellation of a hire booking less than 7 days before the due delivery or collection date will result in the full charge being applied for the hire less any delivery or collection charges.

Any deposits made for the hire of equipment or supply of services for an event are taken to secure equipment, staff and facilities for such booking and are refundable to the hirer after the return of the equipment or completion of the event. The equipment will be checked and tested before the security deposit will be returned. The deposit will be proportional to the cost of the equipment being hired.

The equipment may be fitted with a tracking device if deemed necessary by the company.

The company certifies that all its electrical equipment for hire is PAT tested on an annual basis. Furthermore, each item is checked and tested for wear and tear upon the return of each hire and is certified at that time to be in good working order. All items are visually examined prior to the commencement of hire.

The hirer should make the company aware of the equipment's intended use so the company can best advise suitable equipment & protection if needed. If this information is not supplied or is incorrect, any environmental damage to the equipment or unsuitability of the equipment supplied will be at the fault of the hirer and they will be liable for additional costs incurred.

Should the company consider that the hirer is using the equipment inappropriately, illegally or unsafely then we reserve the right to terminate any contract of hire at any time, and the customer will remain liable for the value of the hire.
